

Module 4 - Notification & Communication

Scope: Spring Boot microservice delivering notifications with Angular admin UI.

Core Services: Template CRUD, merge variables, orchestration, PDF endpoint.

Spring Tasks: secure controllers, mail setup, logging, Resilience4j.

Angular Tasks: admin routes, template editor, notification history, API services.

Data Rules: unique codes, immutable once used, nightly digest placeholder.

Integrations: Gateway routing, Eureka registration, future Kafka topics.

API Hooks: REST endpoint POST /api/notifications/send for other services.

Project Steps: migrations, DTO validation, tests, Angular build, gateway tests.

Containerization: Dockerfiles and compose, document usage.

Next Focus: decide rich text editor, define payload contract, finalize schema.
